

Resqi Ageng Rahmatullah

Software Developer

Jakarta, Indonesia

+628-989-444-349

contact@resqiar.com

Website: resqiar.com

Github: github.com/resqiar

Wakatime: wakatime.com/@resqiar

I am a **Software Developer** from the beautiful country of Indonesia. I specialize in building web and server environments. My favorite tool for servers is Go, for UI is Svelte. However, I am not limited to them, I am comfortable to do outside of my expertise as I feel I can adapt quickly and eager to learn more.

Why I might be worth considering:

1. I have 100+ repositories on Github
2. I have B+ score with total commits of 3.5K on Github
3. I have 2000+ recorded coding hours in Wakatime
4. I develop using Linux, WSL & Neovim daily

Professional Experience

Software Development Engineer in Test Intern

Commsult Indonesia

October 2023 - April 2024

- Developed and maintained automated test scripts using tools such as WebdriverIO to ensure the functionality and stability of product's applications.
- Designed and implemented comprehensive test plans and strategies to validate software features and functionalities.
- Collaborated with software development teams to identify and resolve issues early in the development process, resulting in faster release cycles and improved product quality.

Backend Engineer Trainee

Sagara Technology

July 2023 - November 2023

- Assisted senior backend engineers in designing and implementing scalable and efficient backend systems
- Actively participated in learning opportunities and workshops to expand technical skills and stay current with industry trends and best practices in backend engineering

Education

Bachelor in Computer Science July 2021 - Present

President University at Cikarang, Indonesia

Key Skills

- **Back-end Development - Expert**
- **Front-end Development - Proficient**
- **Docker & Server Knowledge - Competent**
- **Database(s) - Competent**

Accomplishments

3rd Grade National Web Programming
Competition

University of Muhammadiyah Semarang

October 2019

Certifications

Certifications of Completion Android Developer Class
Dicoding Academy

January 2020

Software Projects

Resqiar.com

September 2023

github.com/resqiar/resqiar.com

A personal website of mine that I developed for projects showcases, blogs, courses, community sharing, and more

Api.resqiar.com (Golang Server)

September 2023

github.com/resqiar/api.resqiar.com

Supportive server for resqiar.com web-app built using Golang Fiber

Algorithm Visualizer

July 2022

resqiar.github.io/algo-visualization

Visualize infamous many algorithms for showcase and learning purpose.

Binder (Binder Extension Project)

March 2024

github.com/resqiar/binder

My personal binder extensions. Used to store additional data to organize my binder books.

AI Anime Recommender

April 2023

github.com/resqiar/anime-recommender

Using collaborative filtering to get the similarity score recommendation between users.

Reslang (Building my Own Programming Language)

August 2023

github.com/resqiar/reslang

Isn't it fun building your own programming language? — in learning process though, so the code will still be horrible.
